VOLUNTEERING

[24 Jun 2025 – 7 Aug 2025] **Archeology Volunteering** Bulgaria

As part of the European Solidarity Corps (High Priority Areas) programme, I spent 45 days in Bulgaria, in a small but incredible village called Rupite, excavating the 2,500-year-old Heraclia Sintica Necropolis with 12 wonderful friends.

My passion for archaeology had always been within me. For the first time, I had the opportunity to fully realise it. This programme is paid voluntary work.

[2023 – 2025] **Turkey Youth Foundation**

TÜGVA is the country's largest youth movement, active in many areas from technology to politics, from charity to camps, and from primary school to university.

During my time as General Headquarters Project Commissioner, I advised decision-makers in three areas and carried out projects: innovation, education 4.0 and globalisation.

[May 2023 – Jul 2023] **YGA International**

YGA is a civil society organisation that cultivates role models with two wings. The two wings are science and conscience.

During my time as a YGA volunteer, I worked on the United Nations Sustainable Development Goals, specifically the zero hunger goal. We also launched a pilot project called permaculture.

[2023 – Current] **Sustainable Development and Economy Committee Youth Delegate**

A delegation fully founded and leading by youth localers in Mardin City

IDEATHONS

[Jun 2023 – Nov 2023]

International UNICEF Social Entrepreneurship Ideathon

The International UPSHIFT Social Entrepreneurship Program is a program run by UNICEF and the Ministry of Youth and Sports.

Our startup ERD develops AI and IoT technologies that make efficient and sustainable agriculture viable for all farmers using Smart Agriculture methods.

[2024]

Turkey Scientific And Technological Research Institute High School Research Competitions

The primary aim of this competition is to encourage young minds to think, observe, be curious,

and research what interests them, thereby fostering the development of individuals equipped with 21st-century skills

who can generate solutions to the problems they will encounter in the future.
